

FANS for the CURE

TEAMING UP AGAINST PROSTATE CANCER

CATCH for the CURE

WHAT WE DO

- Online support groups for men
- Online support groups for women/caregivers
- In-person health awareness, education, and screening events in partnership with community leaders and medical providers
- Medical referrals
- *Stay in the Game* podcast

WHO WE SERVE

- Medically underserved communities and where the risk of prostate cancer is highest
- Men with prostate cancer – and their families

WHY IT MATTERS

- **Awareness + screening:** catching prostate cancer early allows the best outcomes with the least likelihood of adverse side effects
- **Support groups:** enabling men and women a single-sex space to share openly about their journey with prostate cancer
- **Advocacy:** sharing insight and feedback with medical providers, while enabling doctors to engage directly with the prostate cancer community

OUR PARTNERS AND FUNDERS 2023/2024
